## ECEN 303: Assignment <#>

1. This document describes the format in which written assignments should be handed in. Failure to meet these requirements may result in points taken off or an overall grade of zero for the corresponding work.
2. **Paper:** Only use paper of **letter** size. That is, every sheet should measure  $8.5 \times 11$  inches ( $215.9 \text{ mm} \times 279.4 \text{ mm}$ ). This is the most common paper size for office use in the United States.
3. **First Page:** The header on the first page should be as displayed above. Your student name, TAMU email address, and the date should appear in sequence on the upper left corner. There should be one item per line, with nothing else at the top of the page. This should be followed by the course number (ECEN 303) and the assignment number, appearing at the center of the next line.
4. **Other Pages:** Write your name in the upper left corner of every sheet of paper you hand in, other than the first page.
5. **Problems:** Every assigned problem should be clearly labeled on the left-hand side. You can use this list as an example of an adequate format. Show your work clearly, and provide convincing arguments. Whenever possible, put your final answer on a separate line and enclose it in a red rectangular box.

Whenever possible, display your final answer inside a red box.
